Attention: Document Control Desk

REFERENCE: Docket 50-186
University of Missouri

SUBJECT: Technical Specification change request
pursuant to 10 CFR 50.59(c) and 10 CFR 50.90.

The University of Missouri Research Reactor requests the following change to Technical Specification 6.1.e. This Technical Specification now reads (as of October 20, 1988; Amendment 16):

6.1.e. Any additions, modifications or maintenance to the systems described in these specifications shall be made and tested in accordance with specifications approved by the U. S. Nuclear Regulatory Commission.

We request Technical Specification 6.1.e to be revised to read:

6.1.e. Any additions, modifications or maintenance to the systems described in these specifications shall be made and tested in accordance with specifications to which the system was originally designed and fabricated or to specifications approved by the U. S. Nuclear Regulatory Commission.

The University of Missouri Research Reactor requested a Technical Specification change to 6.1.e in a letter dated November 22, 1985. The requested change should have been the same as that requested above, since the only intent as stated in the 1985 submittal was to correct the AEC reference to the U. S. Nuclear Regulatory Commission.

Instead, the Technical Specification 6.1.e submitted November 22, 1985 mistakenly omitted the phrase "to which the system was originally designed and fabricated or to specifications."

This requested change will correct Technical Specification 6.1.e to the same Technical Specification that existed prior to Amendment 16, with the only change being the correction of AEC reference to NRC. This change to our Technical Specification is made pursuant to 10 CFR 50.59(c) and 10 CFR 50.90. We appreciate your consideration of this matter and apologize for any inconvenience our error may have caused you.

Sincerely,

J. C. McKibben
Reactor Manager
