Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-424/88-19 AND 50-425/88-21)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by W. Tobin on April 25-29, 1988. The inspection included a review of activities authorized for your Plant Vogtle facility. This also refers to the management meeting held in our office on May 19, 1988, during which we discussed your program for completing the verification of all vital area barriers and your corrective measures to assure all vital area portals remain secure. A summary of that meeting is enclosed as part of this inspection report.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure. Therefore, the enclosures to this letter with the exception of the report cover page, which presents a nonexempt summary, will not be placed in the NRC Public Document Room.

The responses directed by this letter and its enclosures are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

J. Nelson Grace
Regional Administrator
