Secretary of the Commission  
Attn: Docketing and Service Branch  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Sir:

As an employee of New Hampshire Yankee, I am writing to express my opinion as to why a 5% power license should be granted to Seabrook Station.

First and foremost is that New England needs the power. I have lived in this area for the past 6 years. The growth over that period of time has been tremendous. If this development is to continue, Seabrook must go on line.

Second, as a resident of Hampton Beach and with the Plant "in my backyard", I am confident of the many safety features of Seabrook Station. I am a member of the New Hampshire Yankee Emergency Response Team and see first hand the dedication of all participants to the safety of the residents in this area. I feel strongly that the members of this team have a commitment to insure the success of the evacuation plan.

Thank you for this opportunity to express my opinion.

Sincerely,

*Bobbi Jo Olson*
