Docket No. 50-382
License No. NPF-38
Technical Specification Change Request NPF-38-177, Revision 2

Gentlemen:

By Letter W3F1-96-0096, dated July 18, 1996, Entergy submitted to the NRC Staff Technical Specification Change Request (TSCR) NPF-38-177 on behalf of Waterford 3. This TSCR was revised on March 25, 1998 by Letter W3F1-98-0023 to incorporate changes identified by Entergy in a review of this TSCR. On November 17, 1998, Mr. Chandu Patel of your Staff requested a change to remove the words "as soon as possible" from 3.9.8.2 ACTION b. For consistency between the ACTION Statements and with NUREG 1432, Revision 1, "Standard Technical Specifications for Combustion Engineering (CE) Plants," Entergy also desires to make this change to the remainder of the submittal. The attached pages are marked-up to reflect these changes. Please replace pages 3/4 8-8, 3/4 9-8, and 3/4 9-9 of NPF-38-177 Revision 1 with the attached pages. The original Bases page B 3/4 9-2 is unchanged from that provided in Revision 1, but is provided for completeness. This change does not alter the No Significant Hazards Consideration evaluation as provided in Letter W3F1-98-0023.
