

OCT 02 1987

Q Laboratories  
2014 Harrison Avenue  
Cincinnati, OH 45214

Gentlemen:

Enclosed is your NRC License Number 34-25810-01 in accordance with your request.

Please note that the term "authorized user" is used by the NRC to designate someone who has submitted a record of his training and experience to the NRC and has been specifically named on the license document to work independently with radioactive material. In this regard, it is noted that in Item 8 of Addendum No. 1 to your license application, you state that the RSO will supervise the training and use of licensed material by other authorized users. Please note that the RSO will not be authorized to approve authorized users. He will only be permitted to designate appropriately trained personnel who will be supervised in their work with radioactivity (i.e., technicians). If you wish to add additional authorized users, please submit their names and a description of their training and experience with radioactive material.

Also, please note that individuals, including ancillary personnel, whose duties may require them to work in a restricted area must be instructed in the items specified in 10 CFR 19.12. In your letter we received September 25, 1987, it is noted that your program for training ancillary personnel did not include some of the 10 CFR 19.12 specified items.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

8807010368 871002  
REG3 LIC30  
34-25810-01 PDR

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
