SUBJECT: EXERCISE OF ENFORCEMENT DISCRETION RELATED TO NRC INTEGRATED
INSPECTION REPORT 50-352 & 353/98-08

Dear Mr. Rainey:

On October 17, 1998, the NRC completed an inspection at the Limerick Generating Station and documented the results in inspection report 50-352 & 353/98-08.

In the inspection report, the NRC reviewed a licensee-identified issue involving the potential for bypass of the suppression pool. This issue is a violation of NRC requirements, which could be considered for escalated enforcement and be subject to a civil penalty. However, after consultation with the Director, Office of Enforcement and the Regional Administrator, I have been authorized to exercise discretion to not issue a Notice of Violation and not propose a civil penalty in accordance with the provisions provided in NRC Enforcement Policy, Section VII.B.3, Violations Involving Old Design Issues. This decision was made after consideration that: (1) the violation was identified by your staff's good questioning attitude during voluntary initiatives; (2) corrective actions were comprehensive and timely; (3) the conditions were subtle in nature and not likely to be disclosed through routine surveillance or quality assurance activities; and (4) the violation is not reasonably linked to current performance. The exercise of discretion acknowledges your good effort to identify and correct subtle violations, that would not be identified by routine efforts, before the degraded safety systems are called upon.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room (PDR).

We appreciate your cooperation.

Sincerely,

Original Signed by:

Charles W. Hehl, Director
Division of Reactor Projects
