Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Secretary:

My wife and I support your rule that clarifies the requirements new nuclear power plants must meet before low-power testing is conducted.

Do implement it and move forward. Good God, and He is good, do move.

Seabrook in particular is ready and waiting. The wasted money on Seabrook construction and delays is a tragedy of errors.

Do see that operators are properly trained and then issue the license. Excessive delay exhausts the funds of owners and they cannot then implement the facility. A catch 22 situation.

Point up the ridiculous nature of naysayers and go forward! Please. ACT.

Dejectedly yours,

Mr. and Mrs. Howard F. Canning
