DOCKETING  
U.S.NRC

June 22, 1988

'88 JUN 23 P6:05

Dear Sirs:

OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

I am in favor of both a 5% license and a full ~~PR~~ **BRANCH** license for Seabrook Station and would like to see the rules changed to allow this plant to operate.

For years I lived in the town of Haddam, Connecticut within 2 miles of the nuclear power plant located at Haddam Neck. I had built my house in Haddam and raised my children there. My family and I would picnic at the park across the river from Connecticut Yankee along with many thousands of other people. There were never any problems nor did the plant have a detrimental impact on the local ecology. The nuclear plant had virtually zero effluent releases, was quiet and not offensive to the surrounding area. The safety record of the entire nuclear industry, the lack of impact on the ecology, and the lowered dependence on oil all are only some of the reasons why my family and I support Seabrook Station and nuclear power.

I am disgusted and dismayed by the very vocal minority who claim to speak on behalf of the general public. These people are well organized, well orchestrated, and well financed in their opposition to Seabrook Station. I am tired of the half-truths, outright lies, and obstructionist tactics put forth by these 'Anti-nukes' and self-serving politicians.

My family and I now live near Seabrook in New Hampshire and feel that allowing Seabrook Station to operate will be in the best interest of New Hampshire.

Yours truly,

*Alonzo W. Henderson Jr.*
