Secretary of the Commission
Attn: Docketing and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Clarification of Public Notification Requirments for
Low-power Testing.

I support a proposed ruling to clarify the public notification requirements before issuing a low-power license to nuclear power plants.

I believe the delays in the licensing processing must be corrected. This confusion over emergency planning requirements is encouraged by some politicians who are using an anti-nuclear platform to gain popularity. It is costly to the rest of us.

Sincerely,

Ricardo Jovellanos
