Secretary of the Commission
Attn: Docketing and Service Branch
U.S. NRC
Washington, D.C. 20555

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Dear Secretary of the Commission,
I would like to express my support
of the proposed rule which clarifies
the emergency planning requirements for
a low-power license.

There are three major reasons for
my support of allowing 5% testing.

1. As a US NRC licensed SRC
for 8 years I am aware of the
plants safe design and operation.
2. The source term for a plant
operating at 5% is negligible and
poses no threat to public safety.
3. Energy is a national issue
and obstructionism threatens national
security and increased dependence on

foreign energy sources.

Please serve national interests
of clean air and safety by
passing this important rule.

Sincerely,
Robert J. Harley
