DOCKET NUMBER PROPOSED E PR 50

(53FR16435) 6/21/88

DOCKET LETTER

'88 JUN 23 P1:56

OFFICE OF REGULATORY DOCKETING & SERVICE BRANCH

Craig S. Armstrong
11 Laurel St.
Peterborough, NH
03458

To: Secretary of the NRC

I understand that you are considering a proposed rule on low power testing that would allow ~~a~~ nuclear power plants to begin operating at 5% without having a siren system in place.

I TOTALLY support this rule change, especially as it applies to Seabrook Station. I see no reason why Seabrook Station should be held hostage (by Dukakis). Get off the dime NRC! Get Seabrook Station operating!!! Stop the heel-dragging!

Thank you, Mr. Secretary. Please pass my comments on to the Commissioners
