Subject: Arkansas Nuclear One - Unit 1
Docket No. 50-313
License No. DPR-51
Withdrawal Of Proposed Technical Specification Change Concerning The DC
Electrical Distribution System

Gentlemen:

Entergy Operations is withdrawing a technical specifications (TS) amendment request related to the Arkansas Nuclear One - Unit 1 (ANO-1) DC electrical distribution system submitted on May 9, 1996. The proposed change would have incorporated battery and DC electrical distribution system requirements in accordance with a proposed generic change to NUREG-1430 "Revised Standard Technical Specifications - Babcock and Wilcox Plants," Revision 1. Since the proposed generic change has undergone major revisions since its initial submittal, our proposed amendment request no longer reflects the proposed generic change.

Entergy Operations is evaluating a possible submittal of changes to the DC electrical distribution system based on the requirements contained in NUREG-1430, Revision 1.

Since Entergy Operations is withdrawing this amendment request, no further NRC resources should be expended in its review. Should you have any questions concerning this submittal, please contact me.

Very truly yours,

Jimmy D. Vandergrift
Director, Nuclear Safety
