Subject: Arkansas Nuclear One - Units 1 and 2
 Docket Nos. 50-313 and 50-368
 License Nos. DPR-51 and NPF-6
 Correction To Proposed Control Room Ventilation Technical Specification
 Changes

Gentlemen:

By letter dated April 4, 1995 (OCAN049501), Entergy Operations proposed technical specification (TS) changes to the requirements associated with the Arkansas Nuclear One - Unit 1 and Unit 2 (ANO-1 and ANO-2) control room emergency ventilation systems. This submittal was superseded by a submittal dated December 19, 1996 (OCAN129603), and supplemented by a submittal dated August 6, 1998 (OCAN089801).

On page 7 of the attachment to our December 19, 1996, submittal, a table intended as an aid to the reviewer in determining the new locations of previously specified surveillance information was provided. This table is inconsistent with the discussions of the ANO-1 surveillance requirements that are contained in the same attachment which properly characterize the new locations of this information. Therefore, the following table has been revised to reflect the corrected surveillance references:

<u>Current Requirement</u>	<u>Proposed Surveillance Requirement</u>
3.9.1.a	4.10.2.b.1, 4.10.2.e, and 4.10.2.f
3.9.1.b	4.10.2.b.2 and 4.10.2.c
3.9.1.c	4.10.2.b.3
3.9.1.d	4.10.2.d.1
3.9.1.f	4.10.2.d.2

As this letter corrects information contained in our previous submittal and does not introduce any new information, Entergy Operations has determined that the no significant hazards considerations evaluated in our December 19, 1996, submittal remain bounding. Should you have any questions on this submittal, please contact me.

Very truly yours,

Jimmy D. Vandergrift
Director, Nuclear Safety
