OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Dear Sirs:

I am writing to advise you that I support the proposed rule that a full-scale public notification system does not have to be in place prior to low power testing.

Based on the type of construction at Seabrook Station and the technical aspects at low power (from a safety standpoint), a low power license should be issued.

With the recent heat wave in New England it is very obvious we need additional power immediately and Seabrook can contribute to that need significantly.

Therefore, the issuance of the low
power license is needed now,
so I strongly support the proposed
rule change.

very truly yours

David C. Lambert
