OFFICE OF THE SECRETARY  
DOCKETING & SERVICE  
BRANCH

June 22, 1988

Dear Susi:

I am in full support of the proposal to allow 5% power testing without off-site emergency suens.

Seabrook station is a very safe plant - it has gone to extremes to be always one step beyond & above any safety program to become fully operable.

We need this plant and I am confident that it will go on line & run as efficient & safely as can be.
