Secretary of the Commission
Attn: Docketing and Service Branch
US NRC
Washington DC 20555

Dear Sir:

Regarding the proposed rulemaking concerning 5% testing for the Seabrook Power Plant without off-site emergency sirens in Massachusetts, I support the rulemaking and request it be issued immediately. Obviously, the time for the NRC to make a decision that is both correct and good for both Seabrook and the whole industry is now. I am confident the NRC will make the right choice and not allow the Massachusetts political climate to sway their opinion as seems to be the case in the past.
