OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

June 22, 1988

Secretary of the Commission
Docketing and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sirs:

I am writing in support of the proposed rule change regarding prompt emergency notification in the areas surrounding nuclear power plants. I do not feel the system needs to be fully in place to justify the issuance of a low-power testing license. This issue is being contested merely as a political maneuver by short-sighted, self-serving politicians and ill-informed citizens with no consideration of the far more damaging effects of alternatives to Seabrook Station on the environment and the health of the surrounding population.

It is my hope that this process can be somewhat streamlined, and nuclear can be restored to its rightful place as the power of choice for the future.

Very Truly Yours,

David E. Kolonoski
