OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

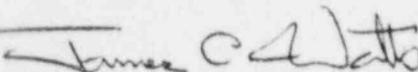

DEAR SIRS;

I am writing to give my support to the Clarification of Emergency Planning Requirements for Low Power Testing.

I feel the rule change is necessary to allow Seabrook Station to move forward towards producing badly needed electrical power for New England.

Seabrook has been proven by inspection after inspection to be the best constructed nuclear power plant. Please approve the rule change & issue a 5% power license and allow NNY to prove to the public Seabrook Station is also the best & safest operated plant.

Sincerely

James C. Watts
