OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

To whom it may concern,

As a resident of New England, I have seen and felt the need for energy - especially during the summer months. After experiencing brownouts and black-outs, I have come to the conclusion we need to utilize all forms of energy production at our disposal - including nuclear. As a resident of Seabrook, New Hampshire, I have been amazed by the attempts to halt the Seabrook power station by local politicians and other groups. Nuclear energy has been with us since the 1950's, it's been proven to be more economical and actually safer than most other forms of energy. I believe it's time to stop listening to all the rhetoric and listen to the facts. Seabrook station is safe, ready and above all needed. Therefore, I am in favor of the proposed NRC ruling, allowing Seabrook station low power licensing prior to the emergency plan approval.

Sincerely,

Joseph W. Noradki
