Attn: Docketing and Service Branch

Dear Secretary,

Please add my name to the list of supporters for the proposed interpretive rule that will allow low power testing without a full public notification system in place.

As a local resident to Seabrook Station I feel quite comfortable with the efforts made by the licensee, the regulatory agencies, and the State of New Hampshire. I feel that adoption of this interpretive rule is imperative to maintain federal control of our energy policy and national security. We cannot allow State or local non-participation or voluntary destruction to prevent licensing of necessary generating facilities. I urge you to adopt this rule and allow Seabrook's low power testing.

ROBERT E. MARBLE JR.
