RECEIVED

NOV 8 1976

Dear Mr. Milton:

EXECUTIVE VICE PRESIDENT

During the past year we at General Electric - Morris Operation have been receiving and storing irradiated nuclear fuel. We are pleased to note that this has been done without incident both on the road and here at the site. While we are working to maintain this safety record we also wish to continue a certain preparedness in the event of an accident. It is instrumental in this effort that our Emergency Plan is kept up to date.

Toward this end we are including the 1976 revisions to the Plan. Most important, however, is the willingness you expressed some time ago to assist us if any emergency develops which requires the aid of medical facilities.

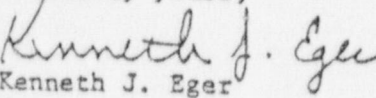

Would you reaffirm this willingness to assist in an emergency in accordance with our previous discussions and arrangements by signing this letter and returning a copy to me.

Finally, I'd like to take this opportunity to invite you and/or a member(s) of your staff to visit our facility for a preparedness meeting on December 9 (7:00 to 9:00 PM). The agenda planned will include the following:

1. Current status and plans for MO
2. Implementation of the Plan - everybody's part
3. A practical emergency drill - is it possible?
4. A tour of the plant

Please let me know of your continued willingness to assist, and if you can come on the 9th. Thank you.

Sincerely yours,

Kenneth J. Eger
Senior Engineer
Safety and Licensing
