U.S. Nuclear Regulatory
7915 Eastern Avenue
Silver Spring, MD 20910

Dear Ms. Solberg:

Enclosed are two copies of our revised Application for Byproduct Material License (Form NRC-313) together with supporting documents. This application is intended as a replacement for the one submitted by ourselves earlier this year. Through telephone communications with you and Mr. Bassin, it is our understanding that the original application would hold our "place in line" until the revised application could be completed. We would appreciate anything you could do to expedite the review of this application, as we are waiting to initiate several radiolabelled metabolism projects.

I will be more than happy to answer any questions you might have or supply additional information at your request, regarding our planned uses of radio-isotopes.

Please direct all inquiries to me.

Very truly yours,

JRM
