Western Nuclear, Inc.  
Field Offices  
Jeffrey City, Wyoming

Attention: Mr. James A. Larson  
Vice President

Gentlemen:

Enclosed is AEC Source Material License No. SUA-565.

Please note that your license is for a one year period only and is scheduled to expire March 31, 1963. Also, the license requires you to conduct radiation safety surveys in accordance with the radiation safety program submitted in your application and supplements thereto. If operations and survey results so dictate, your survey program should be modified as appropriate. Modifications in the direction of additional or more frequent surveys do not require license amendment. However, any modification which would result in a relaxation or delation of any aspect of the program required by the license does require a license amendment.

Your license also requires that you submit quarterly reports of the results of your radiation safety surveys. The purpose of this condition is to keep us informed of your progress in radiation safety and permit us to act promptly on any requests that you might have in the future. We will also be in a better position to review a renewal request for the normal three year period when the present license expires.

In addition, pursuant to the telephone conversation between Mr. Jim Gilliland and Mr. Harmon regarding the increased number of tie down straps to be used during slurry transport, we have added Condition 1k to your license.

With regard to the request in your letter dated November 27, 1962, for exemption from Section 20.103(b) 10 CFR 20, it appears that your method for calculating the appropriate MPC is satisfactory and no exemption is necessary.
