

JUL 29 1981

Docket No. 50-397

MEMORANDUM FOR: R. Auluck, Licensing Project Manager
Licensing Branch #2, DOL

FROM: Ronald L. Ballard, Chief
Environmental Engineering Branch, DE

SUBJECT: WNP-2 PDES REVIEW

On July 24, 1981 we received your undated memo requesting concurrence on the WNP-2 PDES by 10:00 AM, July 27, 1981. We were unable to review and provide comments on a document of this length and complexity in the time allotted. Furthermore, the extensive handwritten changes and the poor editing make our concurrence impossible at this time.

Additionally, on July 27, 1981 we received Amendment 5 to the WNP-2 ER-OL. At least two sections of the PDES will have to be revised to be consistent with the information presented in Amendment 5.

We request, if available, two copies of an edited and typed edition of the PDES. Upon receiving the updated copy we will provide our comments and concurrence, if warranted, in five working days. If an updated copy is unavailable, we will provide comments on the PDES now in our possession by the 7th of August.

Original Signed by Robert L. Samworth

Ronald L. Ballard, Chief
Environmental Engineering Branch
Division of Engineering
