Nuclear Regulatory
Washington DC 20555

OFFICE OF THE
DOCKETING
BRANCH

Gentlemen

There are two Nuclear Plants now on line
fueled up ready to go after having spent
billions of extra dollars due largely to your
not Picking regulations.

They got your permissions every step of the
way, now you will not permit them to
operate. I'd say the U. S. Government is
liable for a Law-Suit.

already the Carbon Dioxide Levels in
the atmosphere have doubled. Talk is
to convince South America to convert
back to tropical forests to attempt to
reduce the ^{increase of} Carbon Dioxide Levels.

yet you people in Washington DC could help
save billions of barrels of ~~poor~~ ^{poor} fuel consumption
per year by allowing two nuclear plants
to operate.

"Whoa the gods would destroy this
first make mad". "Just continue to import oil instead."

Very truly yours
Ernest E Perro
