DOCKET SERVICE
BRANCH

Dear Mr Secretary;

I, as a New England resident, approve the proposal that off-site emergency systems need not be in place with operation of less than 5% of capacity for nuclear power plants

I think the environmentalists have gone far enough in removing existing systems in an effort to block Feabrook's progress. This force has gone on too long - we need Feabrook now! Please do your utmost to get Feabrook on line. Shoreham is dead but Ferry Islanders will regret it! Don't let this happen to Feabrook

Very truly yours
Frank J. Curran
