Docket No. 50-397

MEMORANDUM FOR: William E. Manion, Chief, Financial Operations Branch, RM  
FROM: William O. Miller, Chief, License Fee Management Branch, ADM  
SUBJECT: REACTOR LICENSE FEE FOR WPPSS NUCLEAR PROJECT NO. 2

The Division of Licensing is planning to issue an operating license to the Washington Public Power Supply System for the subject reactor in approximately three to four weeks. This license will be subject to the fee schedule as shown in Section 170.21(a).A.1. of the current Part 170. Please send an invoice for the operating license fee as follows. It is recommended that the invoice not contain a due date of 30 days from issuance of the invoice since the fees are only due upon issuance of the license and we do not know when the license will be issued. If you desire to use a due date, we suggest using the words "Upon issuance of OL". The interest provisions of 10 CFR Part 15 are not applicable to this case.

Send Invoice to: Washington Public Power Supply System

SURNAME

DATE

Since the actual fees to be assessed will be based on the staff hours and contractual services expended, the possibility exists that a refund may have to be made in this case when the project is completed. The Office of Resource Management may want to consider putting the monies received in a deferred account until such time as the data upon which to assess actual costs become available.

Please provide a copy of your invoice for our records and notify this office when the fee of \$1,024,500 has been received.
