HARRY WRIGHT

May 31 1988

Secretary of T.E. Commission  
attn: Docketing and Service Branch  
U.S. Nuclear Regulatory Commission  
Washington D.C. 20555

Your proposed new rule regarding off-site emergency access not being in place for low power testing is an excellent rule that should be passed.

Being a service technician I am fully aware of the fact approaching maximum capacity of our electrical generation unless something is done very soon especially in our area of New England.

I for one along with my family are in favor of the low power testing at Seabrook N.H. and getting this magnificent plant up and running.

Sincerely  
Harry Wright
