SUBJECT Clarification of Emergency Planning Requirements for low power ^{DATE 6/2/88}
licensors

MESSAGE Gentlemen:
I honestly and strongly object your proposed new rules about off-site emergency actions for low power testing.
New England needs this new power ~~plant~~ at Seabrook very much and also needs the reopening of the Pilgrim Station at Plymouth, Mass. It would be very short sighted of the N.R.C. to not put this new rule into effect - and also to repulse local politicians self-seeking rules. Maybe we should deprive them of electricity before the general public when the crisis hits.

Yours very sincerely,
Wentworth D. Shepard
