DOCKET NUMBER
RULE PR 50
(53 FR 16435)

ROBERT E. WELLS, JR. DOCKETED
287 HIGH STREET
ABINGTON, MASS. 02351

'88 JUN -6 P12:47
June 1, 1988
OFFICE OF REGULATORY SERVICE
DOCKETING BRANCH

Secretary of the Commission
Docketing & Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen & Ladies:

I am in favor of your proposed
"Classification of emergency planning req-
uirements for low power licenses"
regulations, and feel that they make
absolute sense. Off-site emergency
forens are unneeded for such
tests, and everyone knows it.

Unfortunately, being from a corner
of liberal Massachusetts, I
am exposed to a disproportionate
number of long haired xiks who don't

realize that we are facing some
near-future serious energy short-
ages. Safe nuclear should be
one of the sources, and it's
absolutely stupid to allow a
bunch of half wits to dis-
rupt the going on line of
this multi-billion dollar
facility, which is so badly
needed.

By the way, I'm sure that
you realize that these same people
who are so opposed to Seabrook,
also would not favor a fossil
fuel facility.

Let's get on with it, and get
some damn electricity now.

Very truly yours,
Robert E. Keller, Jr.

realize that we are facing some near-future serious energy shortages. Safe nuclear should be one of the sources, and it's absolutely stupid to allow a bunch of half wits to disrupt the going on line of this multi-billion dollar facility, which is so badly needed.

By the way, I'm sure that you realize that these same people who are so opposed to Seabrook, also would not favor a fossil fuel facility.

Let's get on with it, and get some damn electricity now.

Very truly yours,
Robert E. Stever, Jr.
