OFFICE OF THE
DOCKETING
BRANCH

Secretary of the Commission
Attn.: Docketing and Service Branch
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sirs:

I am writing in support of the NRC proposed "Clarification of Emergency planning requirements for Low-Power Licenses" and with particular reference to its application at the Seabrook Nuclear Power Plant in New Hampshire.

You may wonder why my concern when so far removed, but I have seen the waste and bungling that occurred at Pacific Gas & Electric Diablo Canyon Nuclear Plant near San Luis Obispo, Calif., costing rate-payers much additional expense, and the problems are still not resolved. New England is experiencing much growth and needs more power for the future. The Seabrook Plant sits idle, but is ready to roll - but for all this resistance. I'm an environmentalist, but I'd rather have the nuclear than this messy coal-burning that they are trying to promote in California.

Please approve the Emergency Planning Requirements that I'm sure the Utility companies will satisfy, and get on with the release of more power.

Thank you.

Respectfully,

John A. Douglass
