Re: Draft Regulatory Guide DG-0007

Dear Sir or Madam:

I would like to add if possible a few comments regarding the proposed guide. Recently I used this guide to prepare a distribution license for F-18 fludeoxyglucose (FDG) for our clinical PET center. The guide was most useful. The guide and our application were well received by the Ohio Bureau of Radiation Protection. You may or may not have had FDG in mind when you prepared the guide but it worked well for FDG. Its real worth is demonstrated by the fact that it isn't item specific and applies equally to by-product as well as accelerator produced material.

Sincerely,

Steve Mattmuller, RPh
Nuclear Pharmacist
