December 26, 1997

U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Document Control Desk

Subject: Quad Cities Nuclear Power Station Units 1 and 2
Quad Cities Licensee Event Report 50-254/97023
NRC Docket Numbers 50-254 and 50-265

Reference: (a) D. B. Cook (ComEd) letter to USNRC, dated November 25, 1997

The purpose of this letter is to inform you of the change of a committed due date
contained in the Licensee Event Report 50-254/97023, reference (a).

In this report, the station made the following commitments:

Revise QCAP 1100-04, by 123197 to require that each procedure revision be
reviewed for possible effect or inclusion as a predefine in Electronic Work Control
System.

Revise QCAP 1100-04 by 123197 to ensure a detailed cross-discipline review for
Technical Specification (TS) compliance is included for all changes to procedures
implementing TS 4.0 to 4.12 requirements.

The station is changing the due date of these commitments to March 31, 1998. The
revision to QCAP 1100-04 will result in a resource impact which was not originally
recognized. This change will allow the station to appropriately align necessary resources
to resolve these issues.

If you have any questions concerning this letter, please contact Mr. Charles Peterson, Regulatory Affairs Manager, at (309) 654-2241, extension 3609.

Respectfully,

E. S. Kraft, Jr.
Site Vice President
Quad Cities Station
