Technical Review Branch Chiefs

REVIEW OF PRELIMINARY TECHNICAL SPECIFICATIONS AT CP STAGE FOR
WNP-1 AND PEBBLE SPRINGS

You are reminded that each TR branch is responsible for the reviewing of technical specifications in the PSAR. This responsibility is in addition to any being exercised by the QA branch in Reactor Projects.

The schedule for requesting additional information and stating staff positions on technical specifications is, of course, the same as for the other aspects of your review (see Q-1, Q-2 and SER draft input target dates). For Pebble Springs these dates are 12/13/74, 4/11/75, and 8/1/75 respectively. SER inputs to LPM should address the acceptability of the appropriate preliminary technical specifications relative to the requirements of section 50.34(a)(5) of 10 CFR 50. Regarding the WPPSS 1, 4 review, several branches have already submitted their SER input and none of these have specifically addressed the acceptability of the PSAR Chapter 16 material. These branches should provide a supplemental statement to Reactor Projects covering the review of the PSAR Chapter 16 material as appropriate to the systems reviewed by each branch.
