

MAY 1 1974

V. A. Moore, Assistant Director for Light Water Reactors, Group 2, L

WASHINGTON PUBLIC POWER SUPPLY SYSTEM, PROJECT 1, DOCKET NUMBER 50-460,
SCHEDULE CHANGES.

The applicant has not responded to our first set of questions originated
by the Electrical, Instrumentation and Control System Branch. According
to our present schedule the applicant's response was due on April 10, 1974.

In view of this delay and our other TR commitments we recommend that
the due date for our second set of questions and positions of May 10,
1974 be deleted from the schedule and a new one be established when the
applicant's response is submitted.

Original Signed by
Victor Stello

Victor Stello, Jr., Assistant Director
Reactor Safety
Directorate of Licensing
