

December 26, 1998

Paul W. Sinn  
Radiation Safety Officer  
Paul Sinn Testing Services, Inc.  
300 S. Euclid Street  
Marissa, IL 62257

Dear Mr. Sinn:

This acknowledges receipt of NRC Form 241 dated December 21, 1998, and the \$1,100.00 application fee, which you submitted to report proposed activities in NRC jurisdiction under the authority of the general license pursuant to 10 CFR 150.20. Your Agreement State License No. IL-01670-01 is recognized as valid for the proposed use of licensed material as described in this initial application not to exceed 180 days in calendar year 1999.

Deletion of specific work locations or work sites, work site contacts, addition and/or deletion of dates of work, or changes in the equipment to be used when there is no change in the activity to be conducted or the radioactive material to be used are considered clarifications and as such, do not require a fee. However, a \$200 fee is required whenever you revise the initial NRC Form 241 to include additional locations of work; when you propose to use different radioactive materials; or you plan to perform additional work activities not previously approved by NRC.

When submitting clarifications of proposed dates and locations of work, please include the Location Reference Number assigned to a particular work location. This information can be found on the approved NRC Form 241, attached.

Please provide us a copy of your renewed Illinois license when received.

We appreciate your cooperation. Should you have questions concerning this letter or other aspects of working in NRC jurisdiction under reciprocity, please contact me at 630/829-9840.

Sincerely,

Marcia J. Pearson  
Nuclear Materials Program Assistant
