Re: Docket No. 50-133 License No. DPR-7

Dear Mr. Goller:

On November 26, 1975 we submitted a report entitled

"Humboldt Bay Power Plant Unit No. 3 Present Capability For a 0.25g Earthquake."

Our letter dated December 29, 1975 supplemented the report. Recently, members of your staff have requested that we verify the implementation of the administrative controls described in the report. This letter responds to that request.

A temporary instruction has been written, approved and implemented limiting the parked position of the refueling building crane to the locations described in the report.

Very truly yours,

3
