Mr. D. R. Gipson
Senior Vice President
Nuclear Generation
Fermi 2 Nuclear Power Plant
The Detroit Edison Company
6400 North Dixie Highway
Newport, MI 48166

Dear Mr. Gipson:

In a telephone conversation on November 4, 1997, between Mr. M. Bielby, NRC Examiner, and Mr. Larry Sanders, Operations Training Supervisor, arrangements were made for the administration of licensing examinations at the Fermi 2 Nuclear Power Plant the weeks of March 23 and March 30, 1998. In addition, the NRC will make an examination validation visit to your facility the week of March 9, 1998.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Interim Revision 8, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outlines by January 9, 1998. The written examinations, operating tests, and the supporting reference materials identified in Attachment 2 of ES-201 will be due by February 9, 1998. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.
