Taipei, Taiwan 106

Dear Dr. Hu:

Thank you for your letter dated September 1, 1997. I appreciate your kind wishes and support for the International Nuclear Regulators Association. The organization continues to develop and I believe it will significantly contribute to better coordinated international regulatory communication and nuclear safety.

I am pleased with the strong partnership between our two safety programs as reflected by our active collaboration under the AIT-TECRO Program on Civil Nuclear Cooperation. Mr. Collins' recent mission to Taiwan is an excellent example of this cooperation and exchange on relevant safety issues, as is the AIT-TECRO Annual Meeting on Civil Nuclear Cooperation in early November, in which several NRC staff members plan to participate.

Thank you for your invitation for Commissioners and other senior managers to visit Taiwan. I remember well your kind hospitality during my visit and the opportunity it gave me to learn more about your nuclear power program and its safe operation.

Sincerely,

*Shirley Ann Jackson*
