Attn: Ms. Jenny Johansen  
Ref: Our phone conversation on February 16, 1984

Dear Ms. Johansen;

This letter is to change our recent amendment request dated January 31, 1984, in which we ask for permission to incinerate laboratory wastes containing radioactive material. In our request we stated that we would dispose of remaining ashes which contain Ca-45 by on site burial according to our existing license condition. We now ask that we be allowed to dispose of these ashes (through our waste hauler) at the Washington State burial facility instead.

Thank you for your attention to this request.

Respectfully Yours,

Jim Tocci  
Radiation Protection Officer
