Syracuse, New York 13202

Dear Mr. Mangan:

SUBJECT: EMERGENCY RESPONSE CAPABILITY (ERF APPRAISAL)
(TAC 45961, 46032, 46104, 46320)

Re: Nine Mile Point Nuclear Station, Unit No. 1

In a meeting on February 24, 1985, the staff discussed the status of your Emergency Response Facilities (ERF) (i.e., Technical Support Center, Operational Support Center and Emergency Operations Facility) and Meteorological Data Upgrade. These are TMI Action Items III.A.1.2 and III.A.2.2, respectively, of the TMI Action Plan, NUREG-0737.

In a letter dated March 13, 1986, you informed the staff of the status of the various TMI Action Plan items. In your submittal you indicated that the ERF and Meteorological Data Upgrade are complete.

The requirements for the ERF and the Meteorological Data Upgrade are in Supplement 1 to NUREG-0737 dated December 17, 1982, and in NUREG-0654, respectively. The schedule to complete these items is in a Confirmatory Order dated June 12, 1984. For these items, you were within the schedules in the Confirmatory Order. The ERF and the Meteorological Data Upgrade will be audited against the staff's requirements by NRC Region I in an ERF Appraisal. This will be arranged by Region I. This concludes the staff's licensing action regarding the ERF and the Meteorological Data Upgrade.

Sincerely,

Original signed by

John A. Zwolinski, Director
