

ENCLOSURE 1

NOTICE OF VIOLATION

Baltimore Gas and Electric Company
Calvert Cliffs Nuclear Power Plant

Docket/License Nos. 50-317; DPR-53
50-318; DPR-69

During an NRC inspection conducted from November 2, 1997 to December 20, 1997, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedures for NRC Enforcement Actions," NUREG 1600, the violation is listed below:

Technical Specification 6.4.1 states that written procedures shall be established and implemented covering the activities recommended in Appendix A of Regulatory Guide 1.33, Quality Assurance Program Requirements, Revision 2. Section 7.e.(1) of Regulatory Guide 1.33 specifies radiation protection procedures for access control to radiation areas including a radiation work permit system. The Calvert Cliffs Radiation Safety Manual, Revision 1, Sections 6.2.1.2.b requires that each person working under a special work permit (SWP), comply with the SWP in all respects. SWP Number 100, Task A, "Shuffle Fuel within the Spent Fuel Pool," specified a survey once per shift while working in the spent fuel pool area.

Contrary to the above, on September 11, 1997, a radiation survey was not done during the shift when plant operators worked in the spent fuel pool area under SWP Number 100.

This is a Severity Level IV violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, Baltimore Gas & Electric Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region I, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because your response will be placed in the NRC Public Document Room (PDR), to the extent possible, you should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if you find it necessary to include such information, you should clearly indicate the specific information that you desire not to be placed in the PDR, and provide the legal basis to support your request for withholding the information from the public.

Dated at King of Prussia, Pennsylvania
this 27th day of January 1997.
