Materials Licensing Branch  
Office of Nuclear Material Safety  
and Safeguards  
Nuclear Regulatory Commission  
Washington, DC 20555

Gentlemen:

Enclosed in duplicate is this medical center's application for renewal of our Type A License of Broad Scope (No. 31-13511-04). The application includes all information required for Items 1 through 24 of NRC Form 313M; our Radiation Safety Manual; and management's ALARA commitment.

Please note that though this is a Broad Scope License, the information has been submitted in the format required in Regulatory Guide 10.8 rather than 10.5, since NRC Form 313M was used.

Since the bulk of our involvement with by-product material is patient care-related, it is imperative that continuity of our present authorization be granted. To this end, we request that our current license remain in force until full consideration is made of our renewal application.

Thank you for your consideration in these matters.

Sincerely yours,

W. L. HODSON  
Center Director
