RECEIVED

Reference: License No. 20-11085-01

Dear Dr. Glenn:

We wish to amend our NRC license to permit us to use greater quantity of ^{14}C and ^3H than in the past. We are interested in increasing our allotment from 20 millicuries of ^{14}C and ^3H to 200 millicuries of each. This is necessary because we are expanding our research efforts and intending on doing more work involving the above isotopes.

A check in the amount of \$120 is enclosed to cover the license amendment fee.

Thank you for your prompt consideration.

Sincerely,

License Fee Information
