MEMO FOR: V. Noonan, Director, Comanche Peak Project  
FROM: H. H. Livermore, QA/QC Group Leader  
SUBJECT: RETENTION OF PRESENT TRT QA/QC GROUP PERSONNEL

As of May 31, 1985, the QA/QC Group will complete the issuance of SER #11. However, this does not complete the NRC's task. This memorandum is prepared to request that the present personnel (V. Wenczel, J. Malonson, V. Watson, T. Curry, R. Bonnenburg, and M. Eli) be actively retained for NRC support of the following:

1. Reviewing TUEC's recovery plans in conjunction with Teledyne. Since the SSER authors conducted the investigation of hardware, inspection activities, records and interviews onsite, their review of recovery plans is considered to be essential.
2. Participating in the ASLB hearings scheduled to begin in September. This is also considered to be essential, since the ASLB typically asks questions of the original investigators, and may not entertain responses from third parties.

It is intended that the above personnel be assimilated into the TRT groups supervised by J. Calvo and L. Shao. You are also requested to discuss with Messrs. Calvo and Shao their need for the above personnel to determine the amount of time and approximate dates their services will be required.

Thank you.

SUBJECT: Retention of Present TRT QA/QC  
Group Personnel

As of 5/24/85, the QA/QC Group will complete the issuance of SER #11. However, this does not complete the NRC's task. This memorandum is prepared to request that the present personnel (V. Wenzel, J. Malanson, V. Watson, T. Curry, A. Bonnenberg, and M. Eli) be actively retained for NRC support of the following:

- (1) Reviewing TUECs recovery plans in conjunction with Teldeyne. Since the SER authors conducted the investigation of hardware inspection activities, records and interviews on site their review of recovery plans is considered to be essential.
2. Participating in the ASLB hearings scheduled to begin in September. This is also considered to be essential, since the ASLB typically asks questions of the original investigator, and may not entertain responses from third parties.

It is intended that the above personnel  
be assimilated into the THT groups  
supervised by J. Calvo and L. Shao.  
You are also requested to discuss with  
Messrs. Calvo and Shao their need for  
the above personnel to determine the  
amount of time and approximate costs  
their services will be required.

Thank you
