Mr. Bruce Mallett, Phd  
Chief Licensing Section  
Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, Illinois 60137

SUBJECT: Docket No. 030-14219  
License #12-18822-01  
Nuclear Moisture Density Tester NIC-5DTM

Dear Sir:

Regarding the inspection of your NRC inspector, Mr. Wayne Slawinski and his subsequent safety report filed as NRC-591 (attached), items 3; 3A and 3E have been corrected.

Regarding 3H we feel we have a "Radiation Safety Officer" in the name of Vidalito S. Lomahan, P.E. although Patrick K. Lee has been transferred to our Pasadena office around 1982. In our letter to the NRC dated May 29, 1980, NRC FORM 3131, Item 7, Messrs V.S. Lomahan and P.K. Lee are designated as "Radiation Control Officers". Also on our letter of application for renewal Item 7 dated May 7, 1985, the names of Messrs V.S. Lomahan, P.K. Lee and William O'Brien were listed as "Radiation Control Officers". All of them have satisfactorily completed the prescribed radiation safety and training programs at Soiltest Incorporation at Evanston, Illinois on July 29, 1980..

Please review the documents cited and advise should further action be required in order to fully comply with our license.

Very truly yours,

GATX TERMINALS CORPORATION
