Subject: Technical Specification Proposed Change No. 190, 10CFR50 Appendix J, Option B, Modification

Reference (b) proposes a change to Appendix A of reference (a). After review of reference (c), it is clear that the proposed Technical Specification change submitted in reference (b) should be altered to remove reference to documents outside of Technical Specifications that define components to which the program applies. In the locations where this occurs, the references do not add substantive information. Removal of these phrases does not alter the Safety Consideration, Significant Hazards Considerations, or Environmental Considerations of reference (b) since these changes are editorial in nature.

New replacement pages 147, 156, and 157 are attached along with revised mark-up pages.

Sincerely,

VERMONT YANKEE NUCLEAR POWER CORP.
