RE: License No. 24-24518-01
Reference No. 030-28715

Gentlemen:

Please be advised that the above referenced license was issued to Charter Hospital of St. Louis, and should have been issued to St. Louis Regional Medical Center, of the same address. Charter Hospital was purchased by St. Louis Regional Medical Center, and we would like to have another license issued in the correct name.

Thank you for your consideration in this matter. If you need any additional information, please do not hesitate to let me know.

Sincerely,

Raymond Mattingly

Gentlemen:

Please amend our by-product material license number 24-24518-01 to reflect the following changes effective November 1, 1985:

- a) Delete Dr. Premsri Barton as an authorized user and radiation safety officer.
- b) Dr. Robert Auffenberg, authorized user, should be listed as the new radiation safety officer.

Our check in the amount of \$120 payable to the Nuclear Regulatory Commission is enclosed.

Sincerely,

Raymond Mattingly

Gentlemen:

Enclosed is Amendment No. 02 to your NRC License No. 24-24518-01 in accordance with your request.

Please note that we have deleted your authorization to use Group IV material, this was necessary since you no longer have a physician authorized for Group IV.

Please note that we have modified Condition No. 16. of your license to incorporate the Model ALARA Program as contained in Appendix O of Regulatory Guide 10.8, October, 1980 (enclosed). If you wish to develop alternative procedures that are at least equivalent to the ones stated in the model program, your license can be amended accordingly.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.

~~8512020617~~

6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Materials Licensing Section

Amendment No. 02

Charter Hospital of St. Louis
5535 Delmar Boulevard
St. Louis, MO 63112

In accordance with letter dated October 21, 1985, License Number 24-24518-01 is amended as follows:

Subitems 6.C., 7.C., 8.C. and 9.C. are deleted.

Conditions 12. and 16. are amended to read:

12. Licensed material listed in Item 6 above is authorized for use by, or under the supervision of, the following individual(s) for the materials and uses indicated:

Beatrice Carlin, M.D.

Groups I, II and III
In vitro studies

Robert Auffenberg, M.D.

Groups I, II and III
In vitro studies

16. Except as specifically provided otherwise by this license, the licensee shall possess and use licensed material described in Items 6, 7, and 8 of this license in accordance with statements, representations, and procedures contained in application dated May 22, 1985; letters dated May 9, 1985 and October 21, 1985; mailgram dated June 28, 1985; and Model ALARA Program as contained in Appendix O of Regulatory Guide 10.8 dated October, 1980. The Nuclear Regulatory Commission's regulations shall govern the licensee's statements in applications or letters, unless the statements are more restrictive than the regulations.
