Ladies & Gentlemen:

Subject: Oyster Creek Nuclear Generating Station (OCNGS)
Operating License No. DPR-16, Docket No. 50-219.
Technical Specification Change Request (TSCR) No. 171
-- Various Sections

On December 10, 1997, GPU Nuclear, Inc., the operator of OCNGS, submitted to the Nuclear Regulatory Commission (NRC) the subject request, seeking changes to various sections of Appendix A (Technical Specifications) of the aforementioned license.

The requested changes include both administrative and technical aspects. According to the licensee, the proposed changes are intended to correct typographical errors, to remove outdated and confusing information, to introduce the results of newer methodologies, thus updating the Technical Specifications (TS) to reflect the plant as currently configured.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering staff reviewed TSCR-171, and has no comments.

If you have any questions please contact Rich P. nney at (609) 984-7558.
