Re: License No. 12-16690-01
Control No. 79761

To Whom it may Concern:

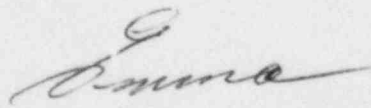

The license for which this amendment is being requested is presently in the process of renewal. The control No. is 79761. Our copy of "acknowledgement of receipt" for renewal of license is dated September 17, 1985.

We are relocating one piece of equipment, which is presently at the Stockton, IL plant, to our plant in Antigo, WI. We would like to ship the equipment mid to late in November if possible.

I realize that Antigo cannot possess the equipment until they are licensed. Therefore, I would appreciate any help you might give in approval of this amendment.

I was informed by your office that Control No. 79761 would be flagged for immediate attention.

Thank you very much for your helpful advice and your consideration in this matter.

Emma Van De Mark

AMMENDMENT

Re: License: #12-16690-01
Control #79761

Please amend our nuclear license as referenced above. We wish to continue to operate under the present license.

All documents in reference to this license have been reviewed and the information determined to be correct, with the following exceptions as stated below:

Documents previously submitted that reflect our present license are:

Application - dated October 20, 1980
Amendment No. 5
Amendment No. 6
License Renewal - dated September 9, 1985

We will continue to operate in accordance with these documents and applicable NRC regulations.

Item No. 3

Please add Kraft Inc. plant at 907 Ninth Avenue, Antigo, WI 54409, as an additional location for use and possession of equipment.

Items 5 and 6 are correct as stated on the present license.

Item No. 7

Individuals responsible for radiation safety at the Antigo WI location will be Mr. Bob Koszarek and Mr. Ronald Duchrow. A resume' for each is attached.

Item No. 8

A training session for safety officers, management personnel, and line personnel working within the general area of the equipment will be conducted by Texas Nuclear personnel at the time of installation.

The involved personnel have read and are familiar with the NRC regulations.

Item No. 9

A drawing is included showing the location of the nuclear device. There will be one person in the pan room for each eight hour shift.

Page 2 of 2

Item No. 10

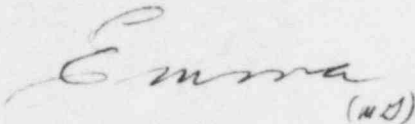

Safety radiation programs will be provided as personnel changes are made.

A check in the amount of \$60.00 is enclosed to cover the amendment.

All inquiries should be directed to:
